

The Hungarian Post, a reliable partner for Infopress Group

This year Infopress Group expands its postal distribution capacity in the world's most remote locations due to its strong partnership with the Hungarian Post. The company clients have now the possibility to benefit of complete postal services, taking advantage of reduced prices and delivery speed.

The necessity of this partnership started from our clients' strong desire to be assured that their printed products can be delivered all around Europe. Monthly, the production process is executed in the best quality conditions possible, from the moment of launching the printing and distribution order to the delivery. We meet our clients' needs and put at their disposal this service, ensuring total confidentiality of the provided information.

The end of 2011 was marked by multiple postal references, often required by our external customers from Denmark, France, Holland or Norway. All in all, we believe that the partnership between The Hungarian Post and Infopress Group brings direct benefits to all the parties involved in this process.
