

Infopress Group offers new screen printing service

Infopress Group installed this year, in January, a new equipment, Vitessa Classic G1 Screen Printing Press, specialized in UV varnish and scratch cards operations. Being in a continuous process to diversify its production facilities, Infopress Group has the technology to offer also screen printing services.

Even from the installation of this equipment our production team has been testing it in order to use the machine at its maximum capacity. As a result of the investment and of the production tests, starting from this month, Infopress Group offers to its clients this new screen printing service.
